

MANOJ KUMAR M

Data Analyst

manojmottai3@gmail.com | +919629633830 | github.com/Manojkumar-0915 | linkedin.com/in/manojkumar6274/

PROFESSIONAL SUMMARY

Recent B.E. Computer Engineering graduate with hands-on experience through internships in Data Analytics and Data Science. Skilled in Python, Excel, Power BI, and SQL, with experience building dashboards and deriving actionable insights from datasets. Seeking an entry-level Analyst role.

EDUCATION

B.E., Computer Science and Engineering CSI College of Engineering — CGPA: 7.42	2022 – 2026
Higher Secondary Certificate (State Board, Comp-Maths) Government Higher Secondary School, Yedakkadu — 66%	2021 – 2022
Secondary School Certificate (State Board, Comp-Bio-Maths) Vivekananda Memorial Matriculation School — 69.4%	2019 – 2020

SKILLS

Programming Language – Python, SQL
Tools – Git, GitHub, MySQL Workbench
Technical Skills – Microsoft Excel, Power BI, Tableau
Database: SQL Commands, Clauses, Constraints, Joins, Set Operators, Views, Subqueries, Functions, Procedures, Triggers
Soft Skills – Teamwork, Communication, Adaptability

TRAINING & INTERNSHIPS

Besant Technologies Chennai, Tamil Nadu	June 2026 (Present) Offline
Gained hands-on experience with Microsoft Excel, SQL, Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, and Statistics. Performed data cleaning, exploratory data analysis (EDA), data visualization, and dashboard creation.	
Power BI - Internship Topdataworks, Chennai	Aug 2025 Online
Built interactive Power BI dashboards using YouTube campaign datasets to analyze engagement trends and campaign performance. Created reports with KPIs, cards, filters, and data connection models for effective data visualization. Gained practical exposure to Scrum methodology, business intelligence reporting, and dashboard development.	
Internship - Data Analytics Cloud Institutions, Coimbatore	July 2025 Offline
Developed interactive Power BI dashboards using advanced features such as tooltips, slicers, drill-down, drill-through, DAX calculations, data modelling, and data transformation (Power Query) to analyse datasets and derive meaningful insights for business decision-making.	
Data Science Internship Lets GameTech, Coimbatore	Feb 2025 Offline
Applied Python for data analysis and machine learning using libraries like Pandas, NumPy, Matplotlib, and Scikit-learn, including data preprocessing, visualisation, feature engineering, and building predictive models to extract actionable insights.	
Data Analytics Intern Novitech R&D Private Limited, Coimbatore	Dec 2024 – Jan 2025 Online
Utilised advanced Excel techniques, including formulas (VLOOKUP, INDEX-MATCH, IF), Pivot Tables, dashboards, and statistical analysis to clean, analyse, and visualise data, enabling data-driven decision-making.	

PROJECTS

Apex Digital Marketing YouTube Campaign Analysis PowerBI
Analysed 5,000+ records from YouTube campaign datasets and created dashboards to identify engagement trends.

CERTIFICATION

Data Science Using Python – SWAYAM
Completed a 12-week certification course with 69% score and gained knowledge in data preprocessing, EDA, visualisation, and basic machine learning using Python libraries to analyse data and derive insights
Data Analytics Job Simulation Certificate
Completed a real-world job simulation focused on data cleaning, analysis, and visualisation; derived insights, built dashboards, and effectively communicated findings using data visualisation techniques.
